

Atlantic & Pacific Rail Supply

Supplying North Americas
Railways Since 1939

*Manufacturer of Cedar Tie Plugs
Natural and Borate treated*

- Once the BORATE treated Cedar tie plugs is installed in the RR tie, with the assistance of humidity, BORATE diffuses itself around the hole into the cracks for long term protection of the tie.
- Wood around the BORATE treated Cedar tie plugs becomes nonviable for insects and decay fungi.
- BORATE Treated Cedar tie plug, an active tie plug, not only fills the holes, but puts in a tie protection, giving extra life to the RR ties.
